Carline

Parents are scanning a QR code as they enter the property. They can then select their scholar from the menu. The scholars name will appear on the screen in the classroom and tell the teacher to dismiss the scholar for pickup. This is similar to the system that Coweta county uses but their system requires each name to be entered by a carline personnel as they drive in to the property. The system is up and running and working better daily. I have had two formal complaints to date.
